

How to create a custom designed Poster Print using a Digital Kit

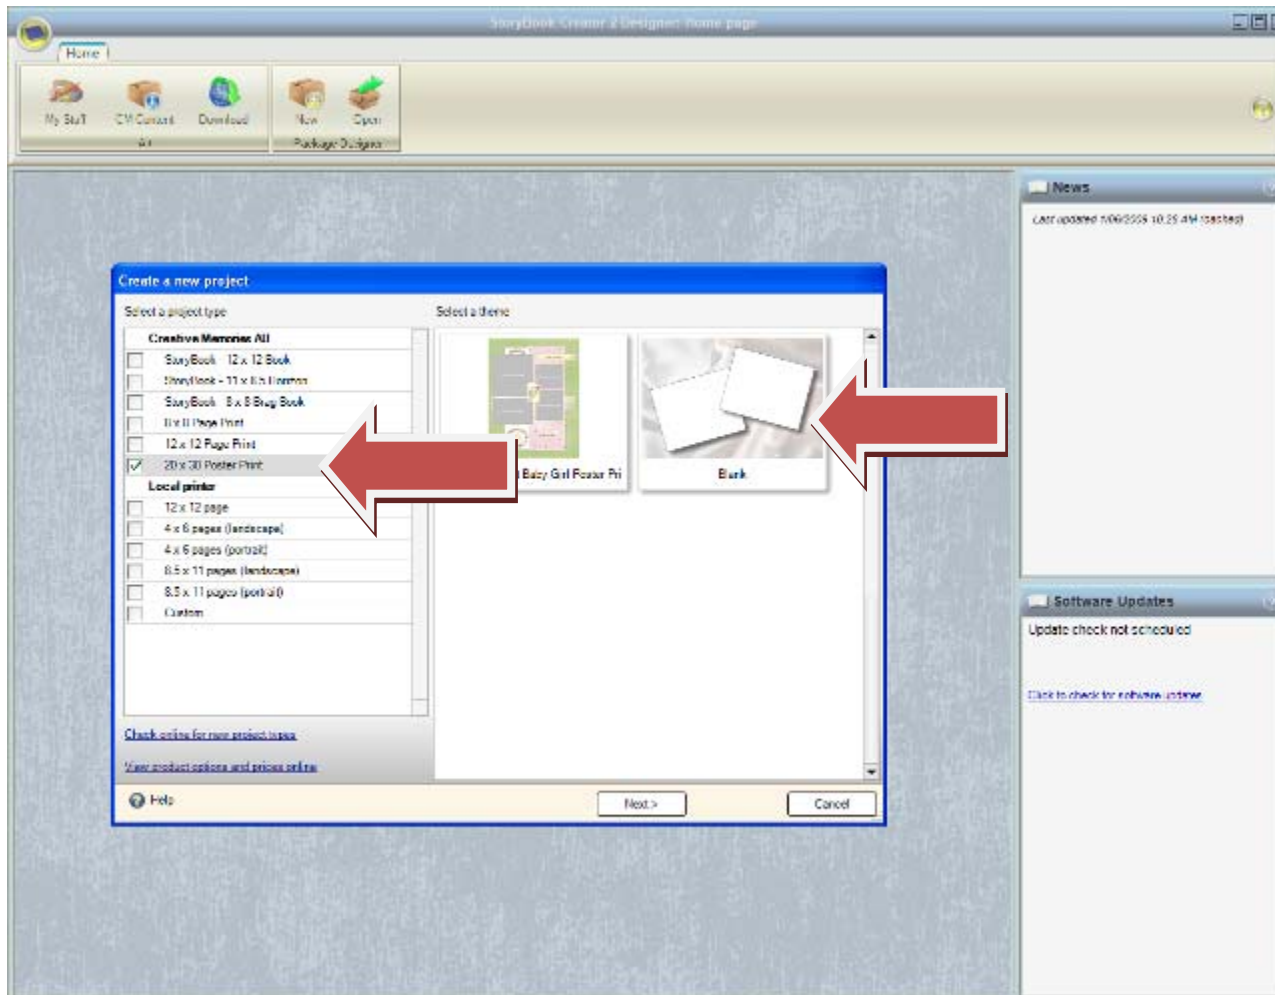

From the Home Page, click on **Create a new project**

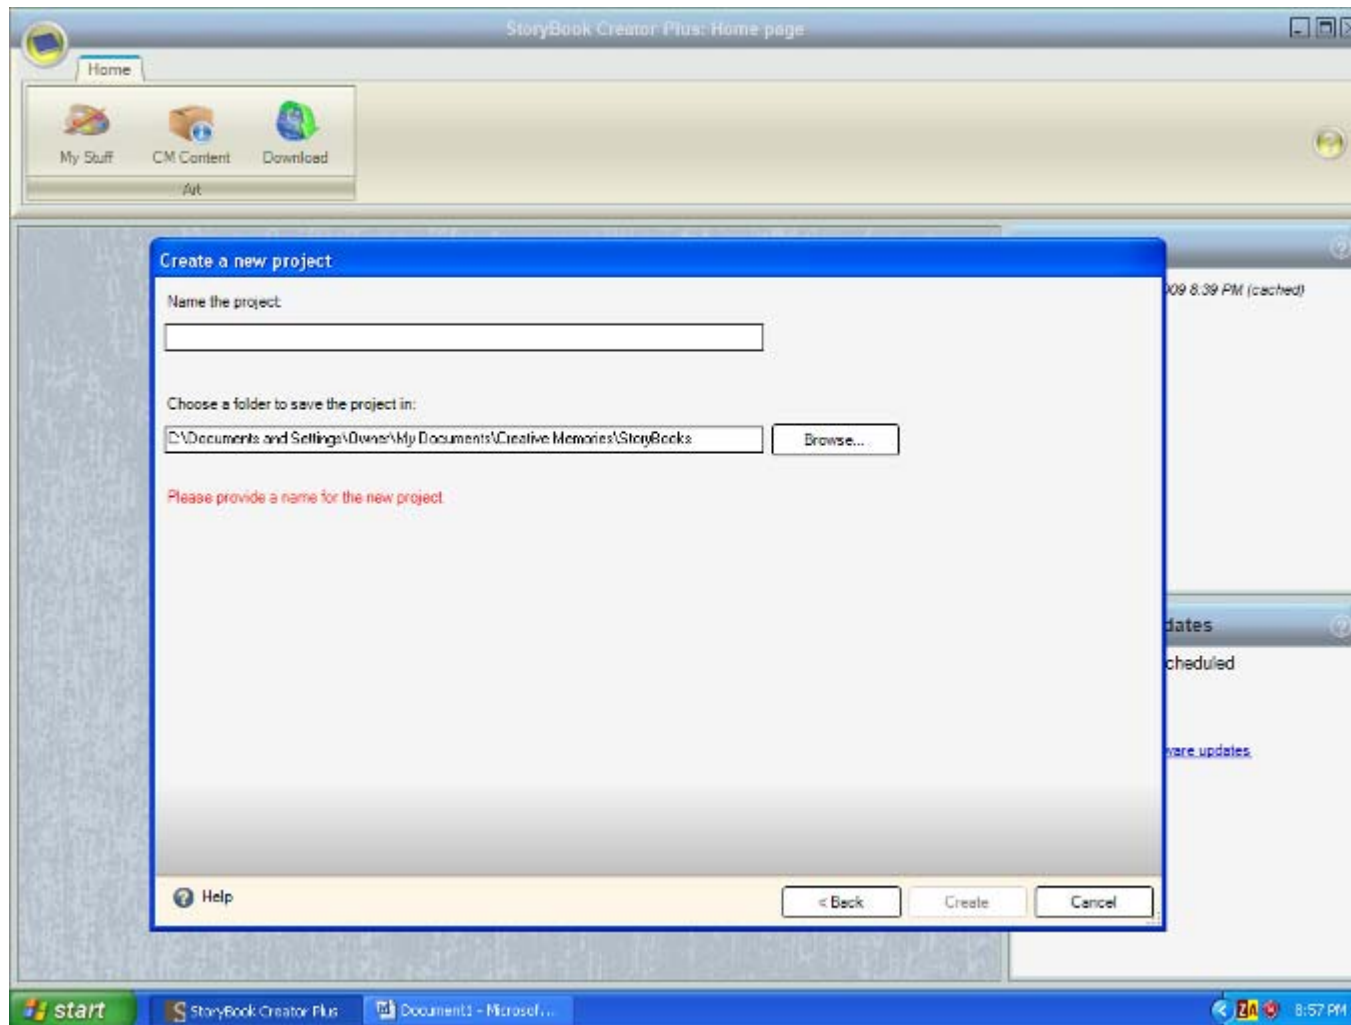

The *Create a new project* dialog box displays. You will see the Poster Print project options.

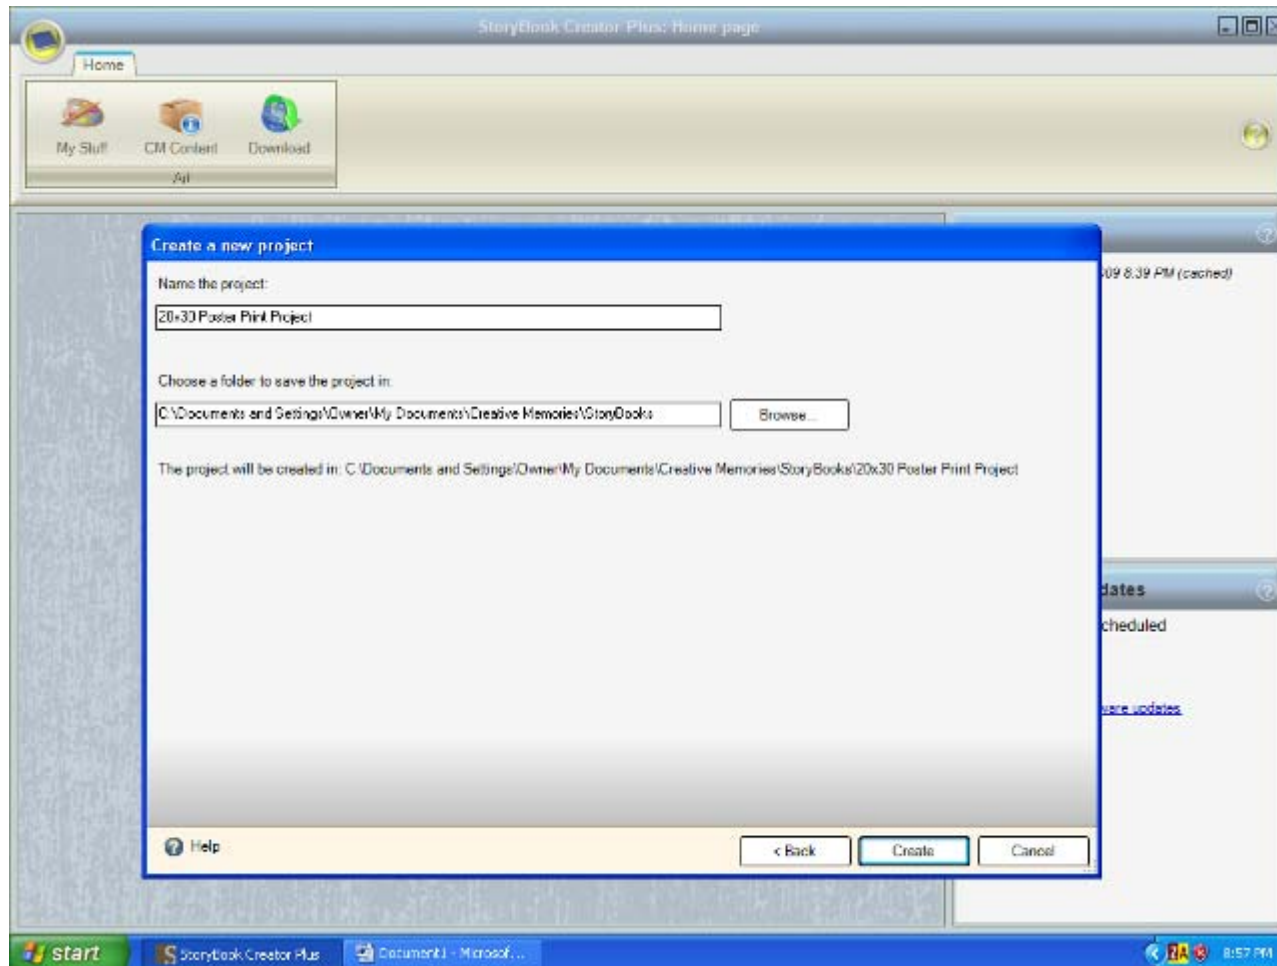

Select Poster Print by ticking the appropriate box. Then click on the **Blank** theme. Click on **Next** to continue.

Type in the name of your new project in the space provided. **Browse** to the location on your computer where you want your project saved.

After you've named the project and established its location on your computer, click on **Create**.

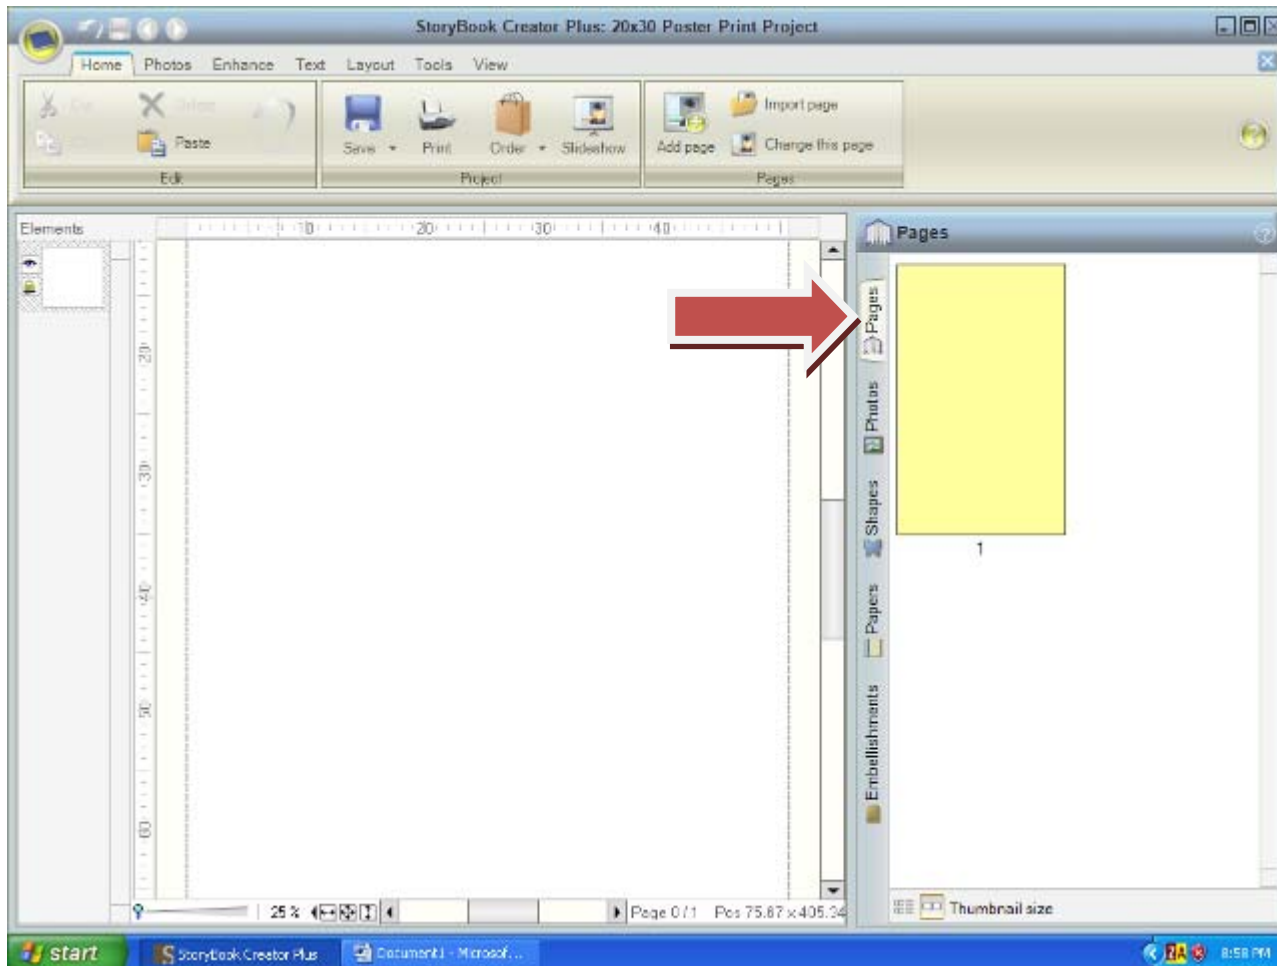

You're now ready to create a Poster Print of your own design. Just a few notes:

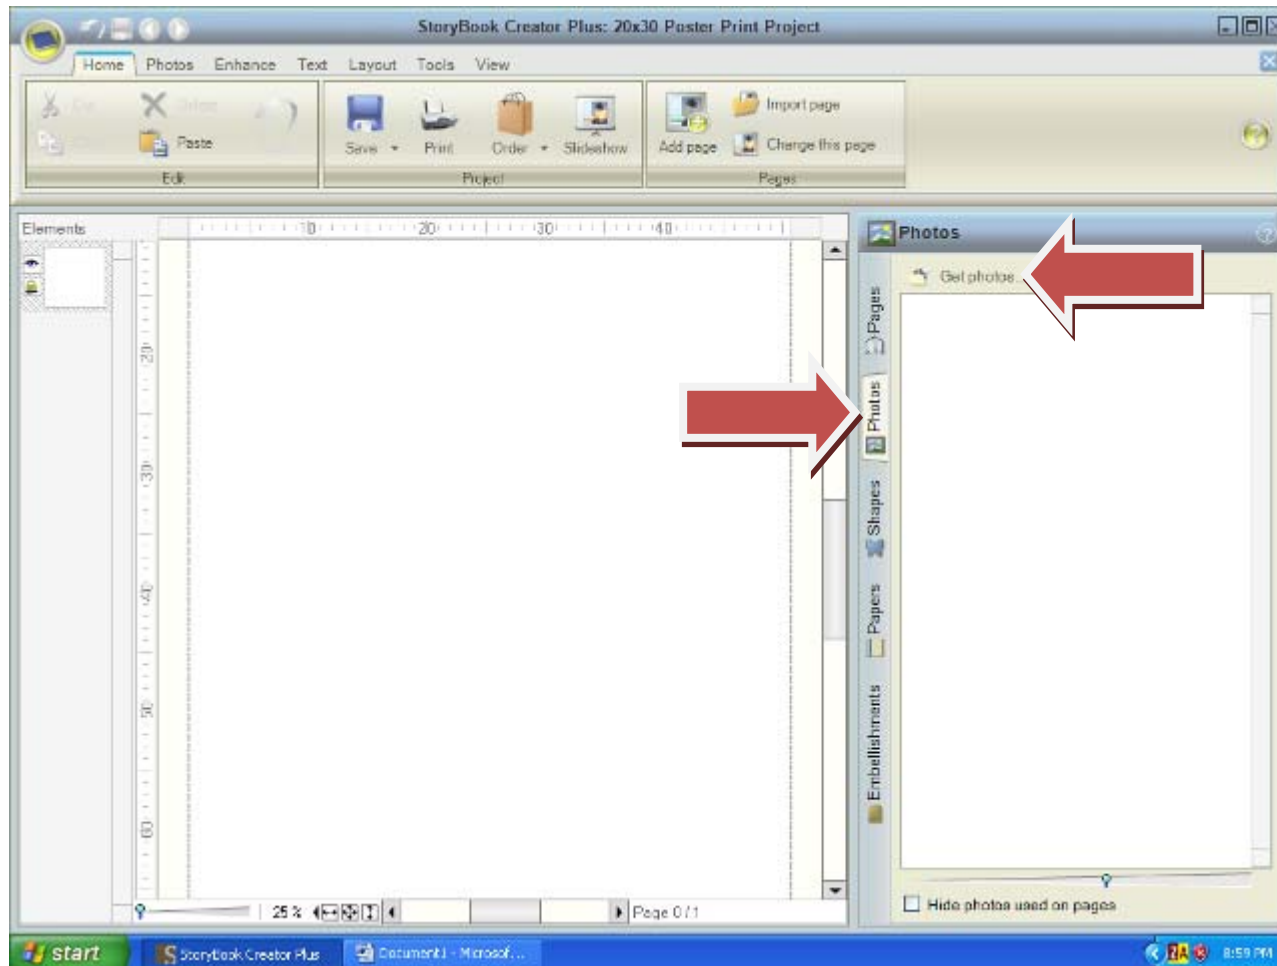

Create one Poster Print per project. A Poster Print creates a VERY large file, so saving each one in a separate file will enable your computer to handle several projects more efficiently.

Extend your background to the edges of the Poster Print document. However place any added elements, such as photos and embellishments approximately 2cm from the edge of your Poster Print. This space allows for any trimming needed after printing.

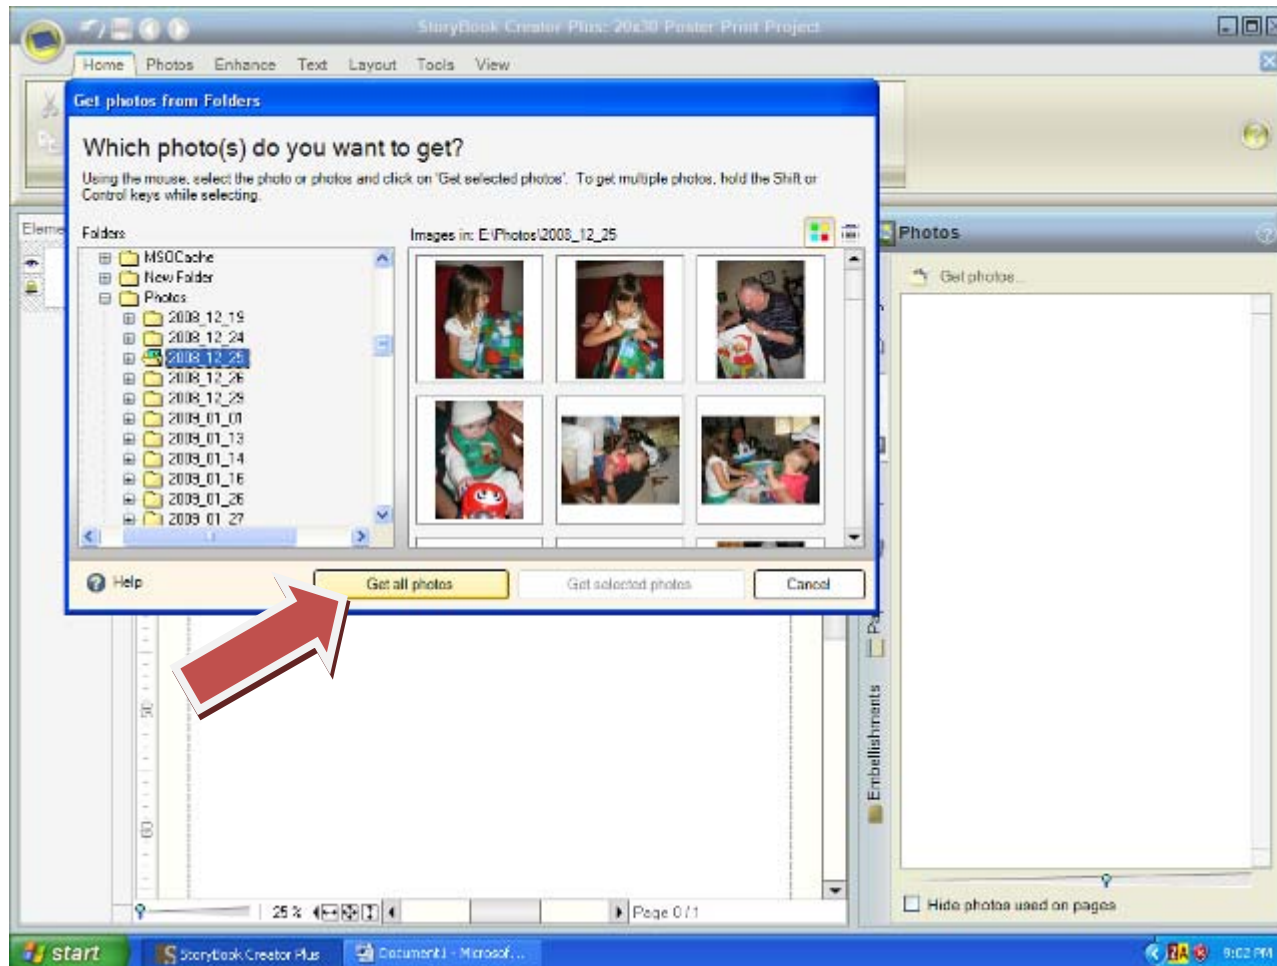

Your blank Poster Print displays the same as a new StoryBook or Page Print project. To view the Poster Print, select the **Pages Panel**.

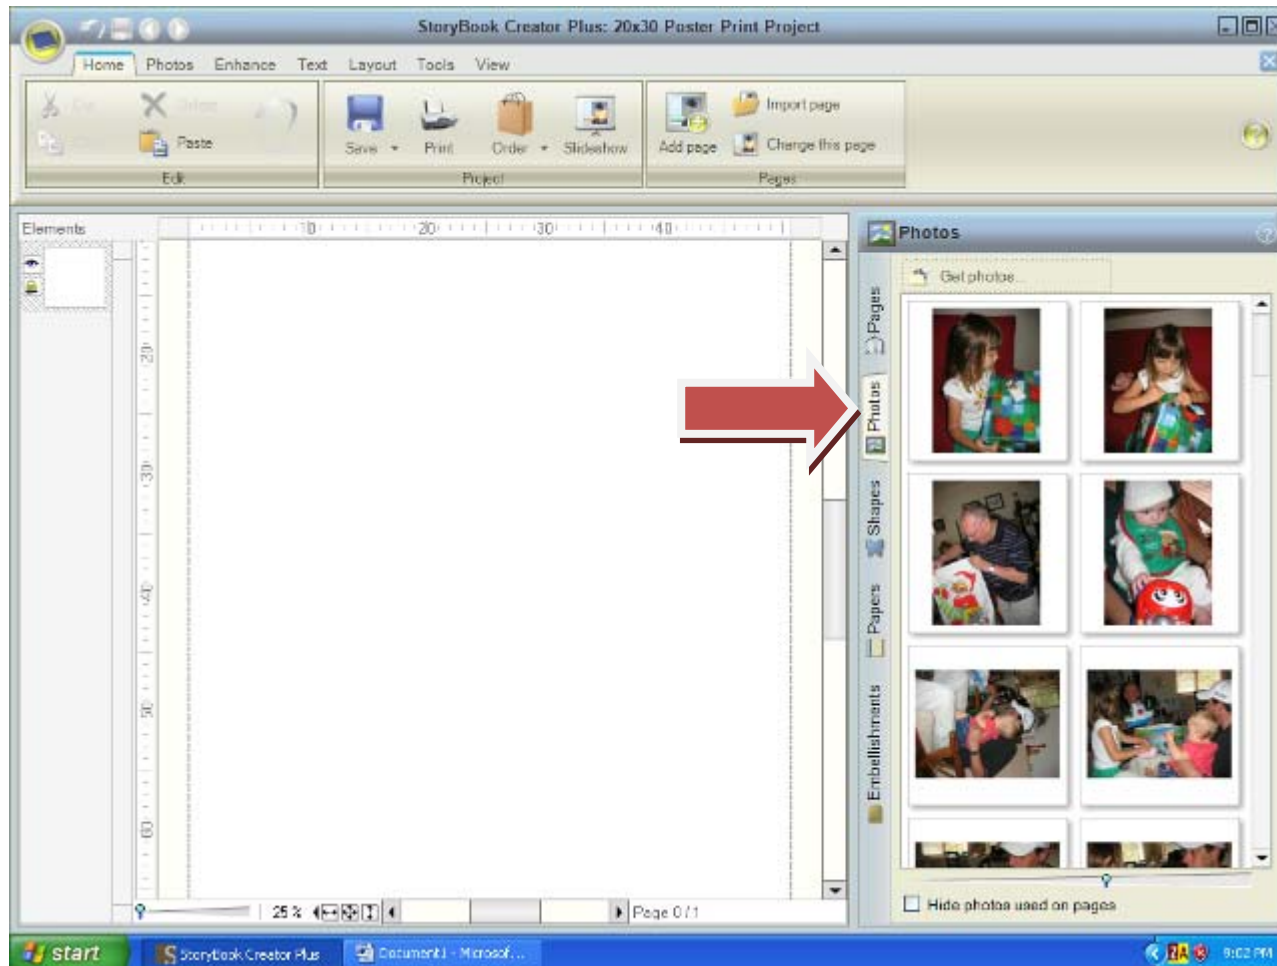

Now you can design your very own Poster Print. Start by bringing in your photos. 1. **Select** the Photos Panel. 2. Click on **Get Photos**.

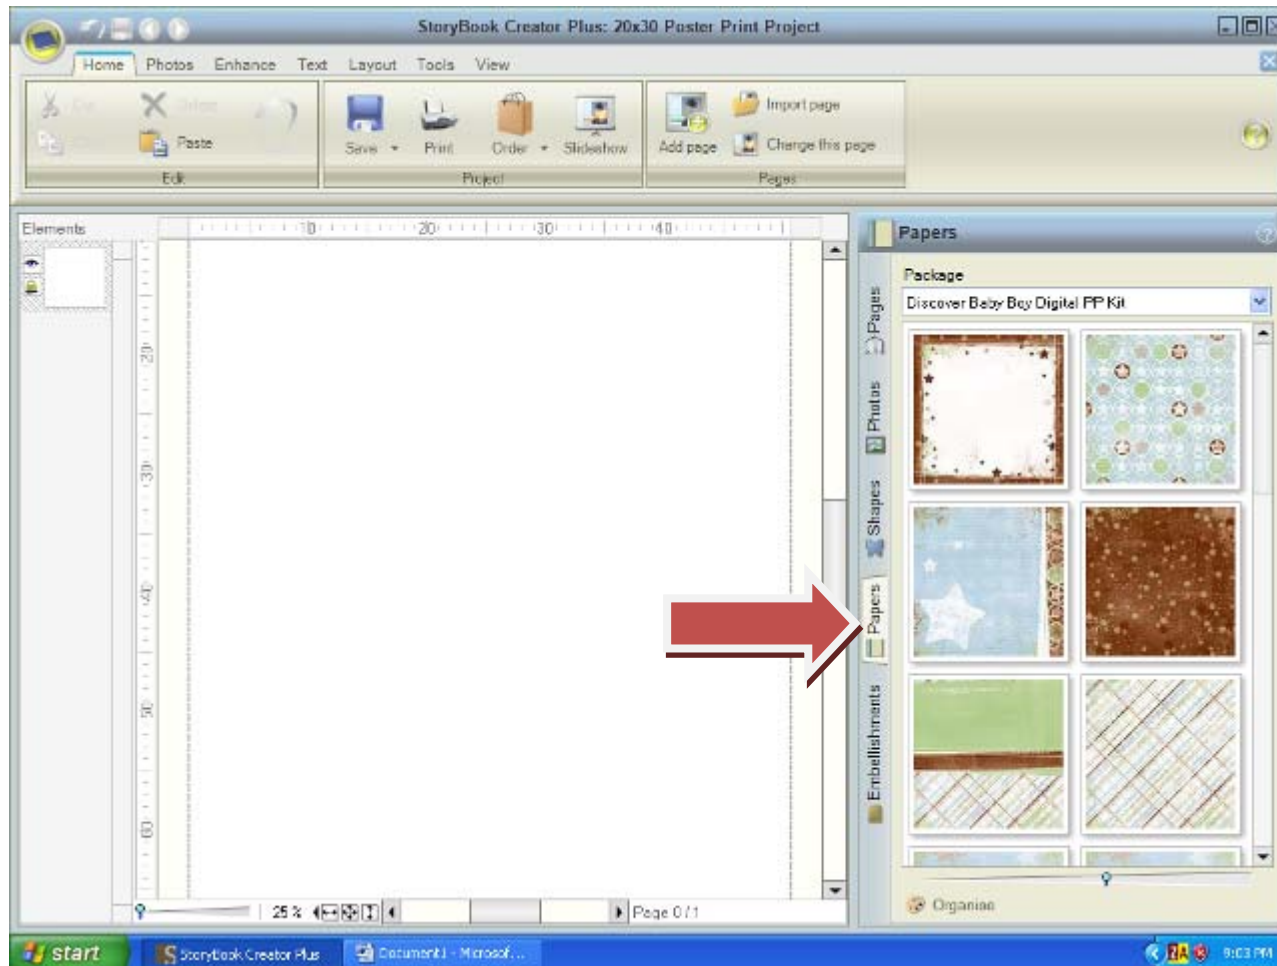

The *Get photos from Folders* dialog box displays. **Scroll** to where your photos are located. Select the photos you want to use for your Poster Print. To bring in an entire folder of photos, click on **Get all photos**.

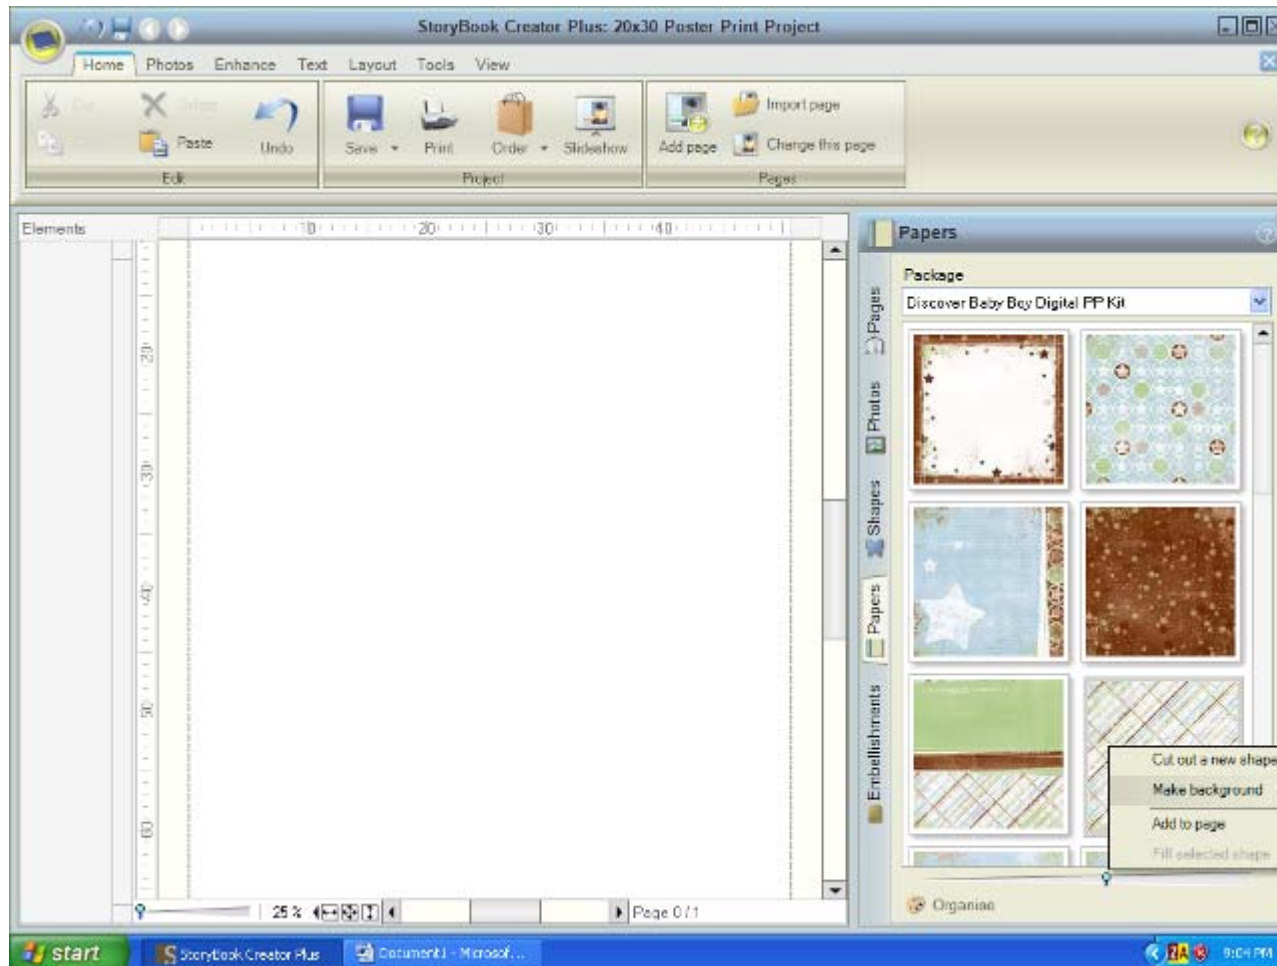

Your imported photos now display in the **Photos Panel**.

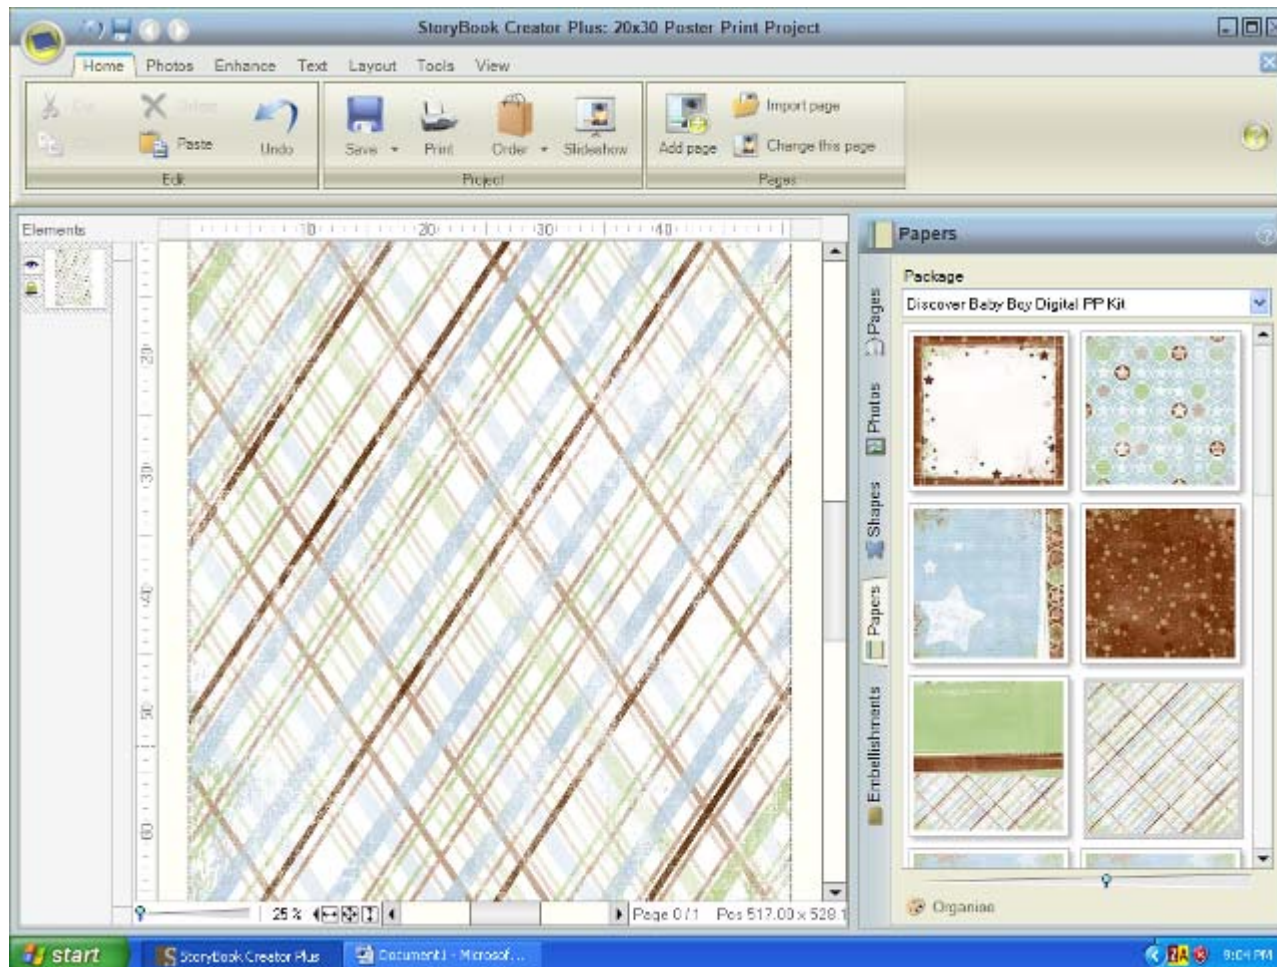

To choose a specific paper for your Poster Print background, select the **Papers Panel**.

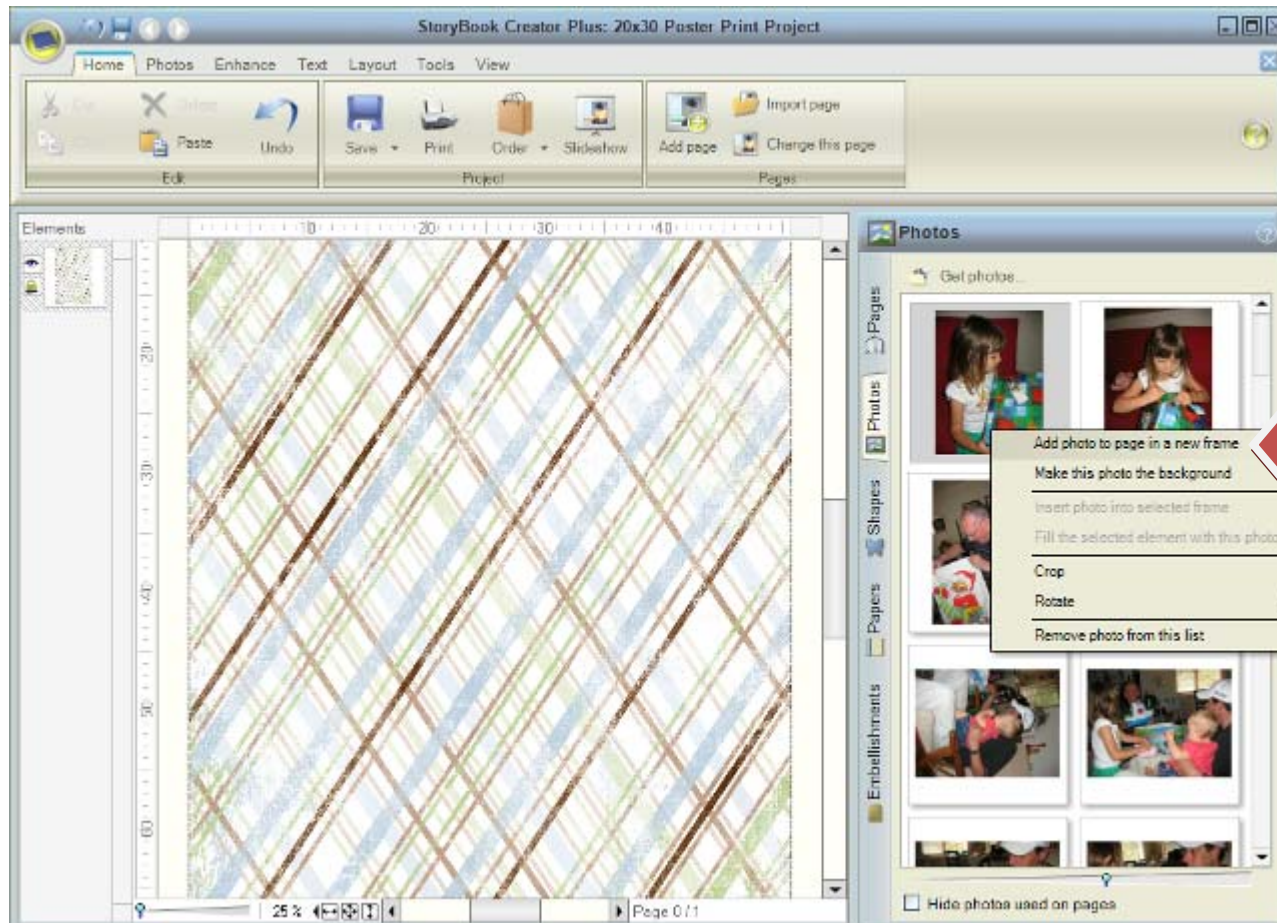

Select your paper design by clicking on it. Click on the drop-down menu arrow on the edge of your selected paper, click on **Make background** from the drop-down menu.

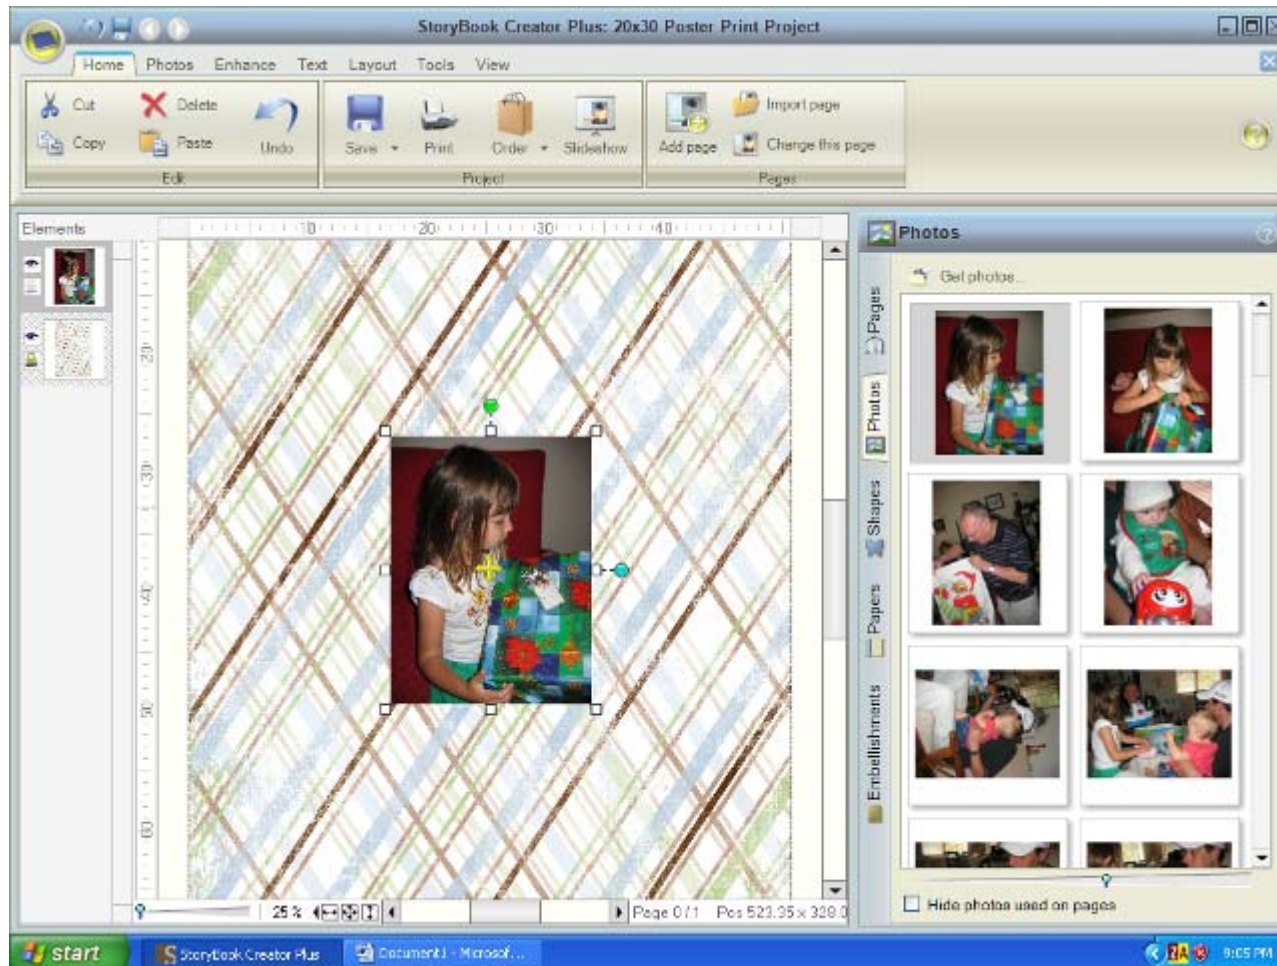

The selected paper becomes your background.

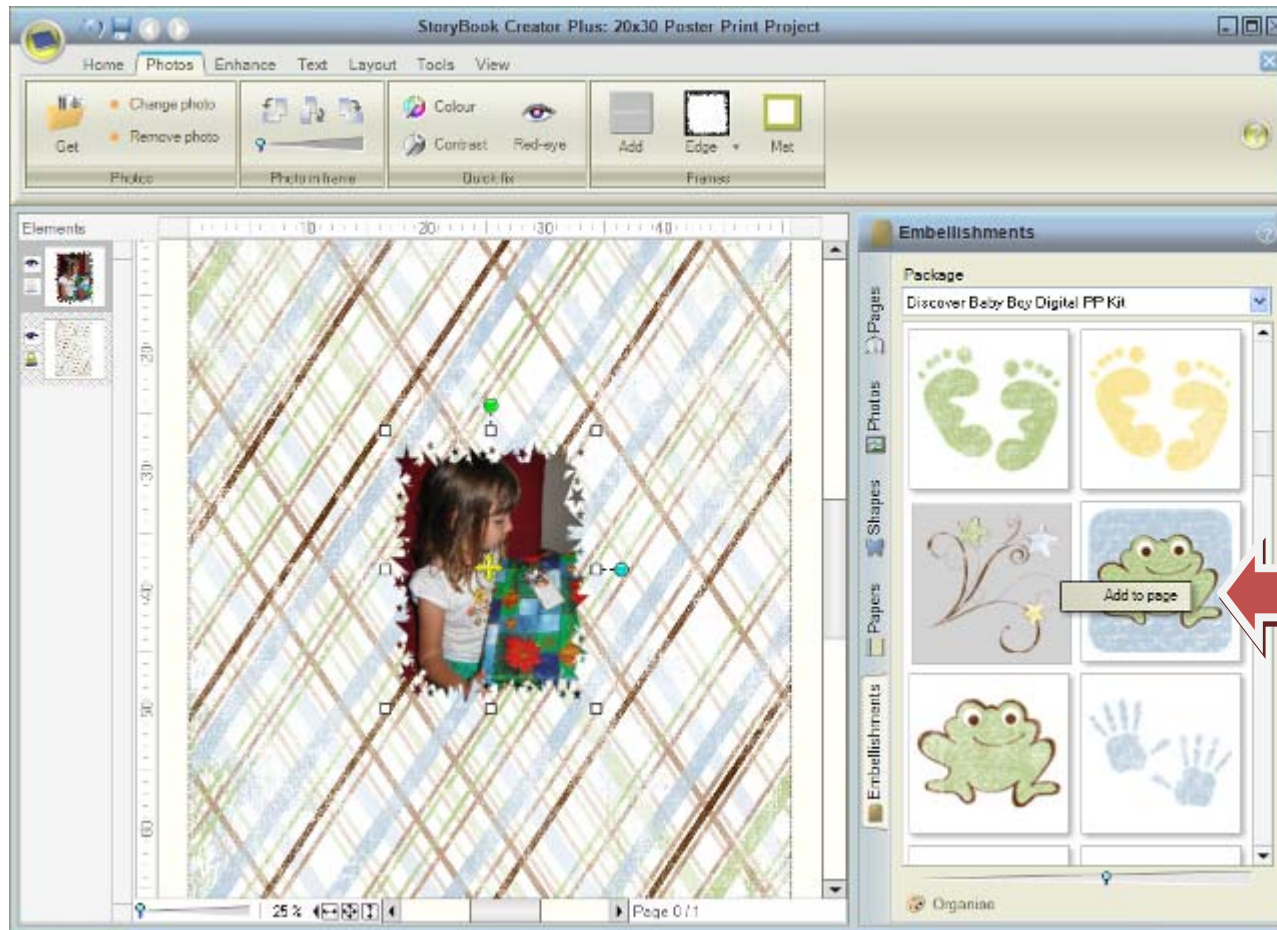

To add photos, repeat the same process you just used to add a background. Select the **Photos Panel**. **Scroll** to your photo and select it. **Click** on the drop-down menu arrow on the edge of your selected photo, **click on Add photo to page in a new frame** from the drop-down menu.

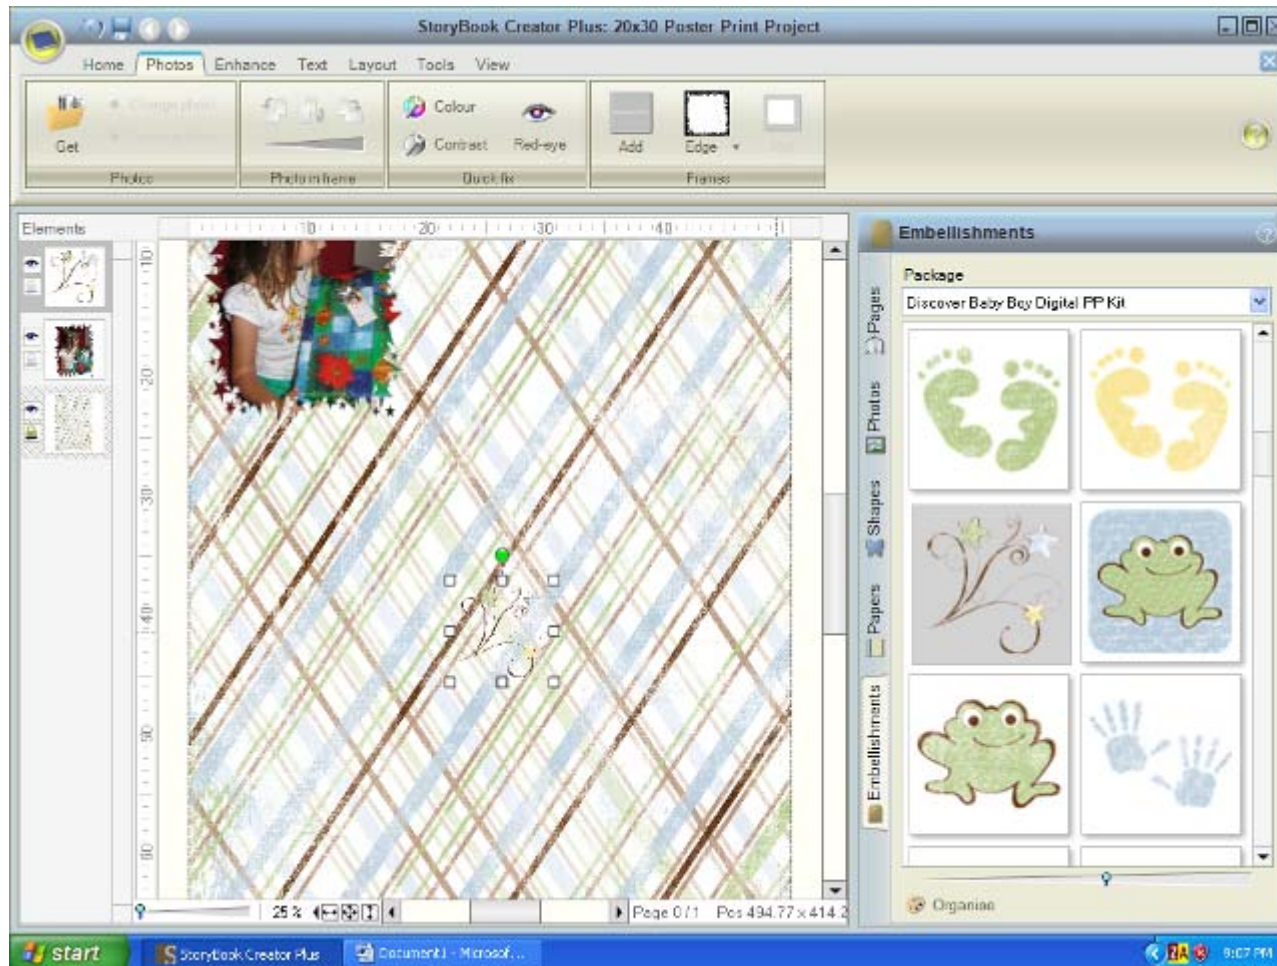

Your photo is added to the page. You can now resize and reposition your photo on the page, and add photo mats or edges to your photo. Remember to place your photo approximately 2cm away from the edge of your Poster Print.

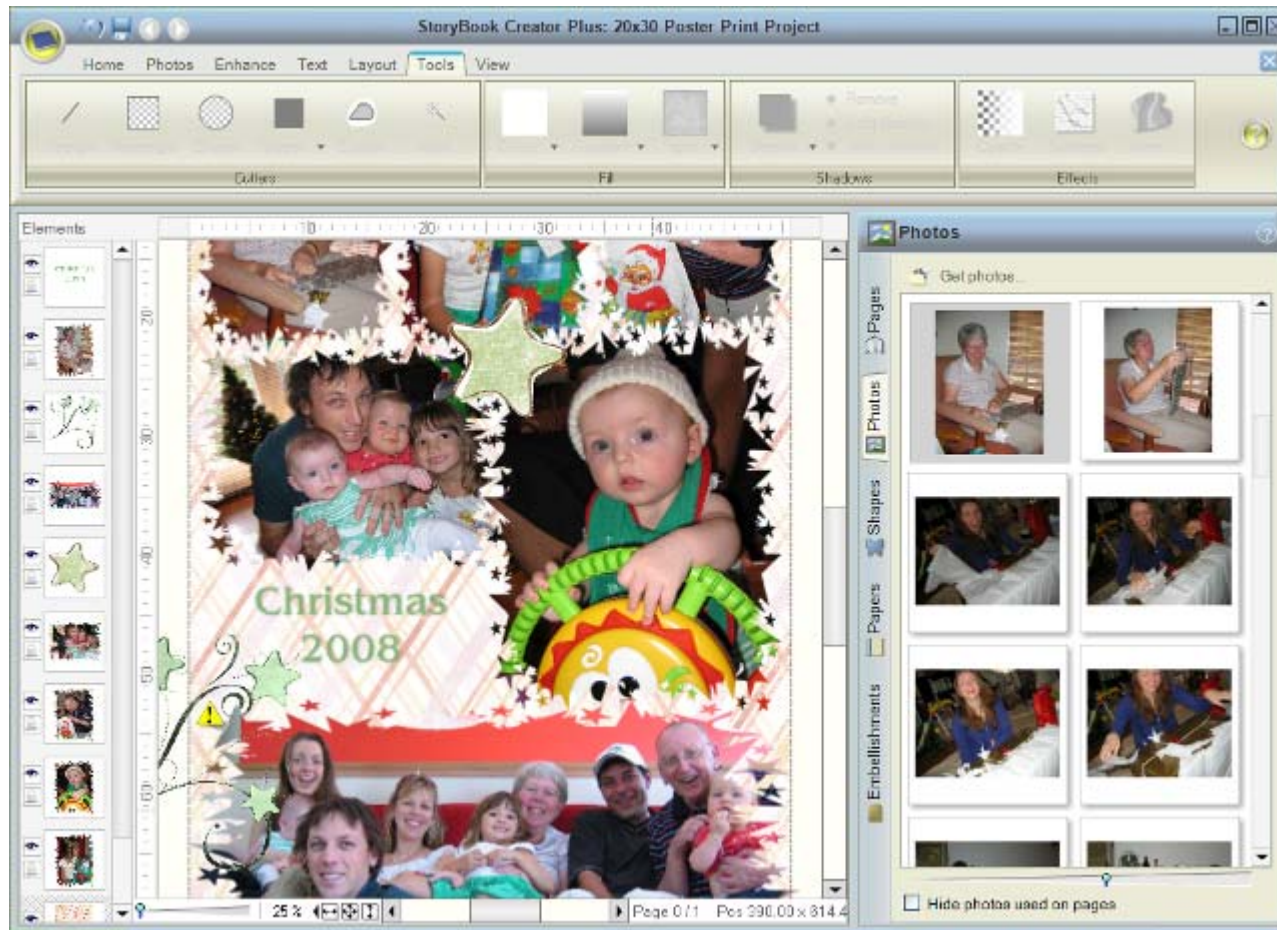

To add embellishments, repeat the same process you used to add a background and photo to your Poster Print. **Select** the Embellishments Panel. **Scroll** to the embellishment and select it. **Click** on the drop-down arrow on the edge of your selected embellishment, click on **Add to page** from the menu.

The embellishment is added to the page. You're now able to resize or reposition the embellishment on the page. Use the same process to add shapes, embellishments, papers or photos to your Poster Print. It's that easy!

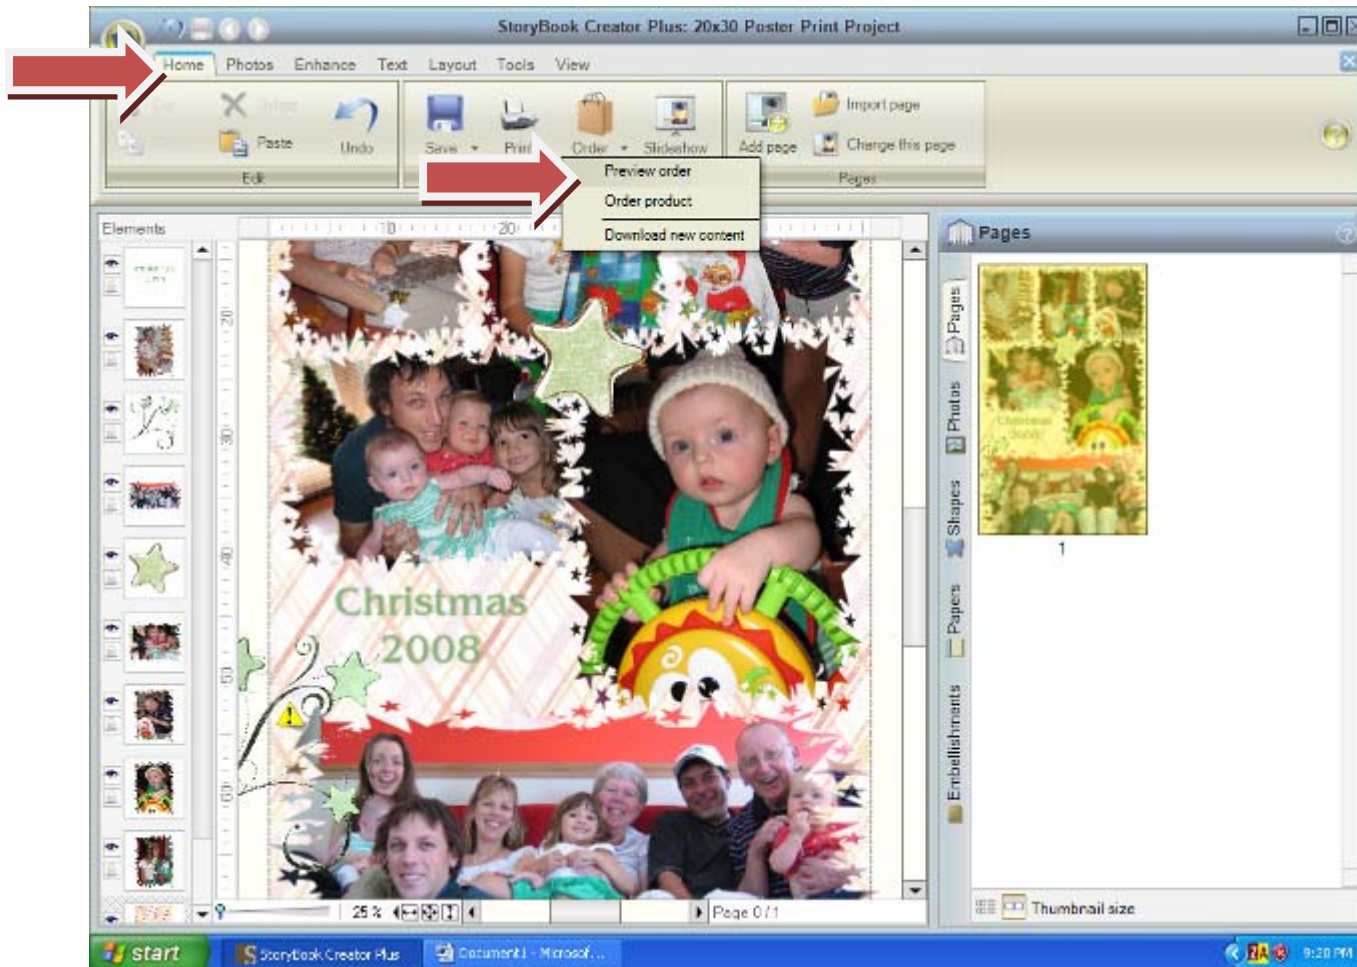

By following these easy steps, you can create your own custom designed Poster Print using StoryBook Creator Plus Software. For information on how to re-colour elements, add photo mats and create many other decorative looks see the online tutorials available on www.cmphotocentre.com.au and www.cmphotocentre.co.nz or help files within StoryBook Creator Plus Software.

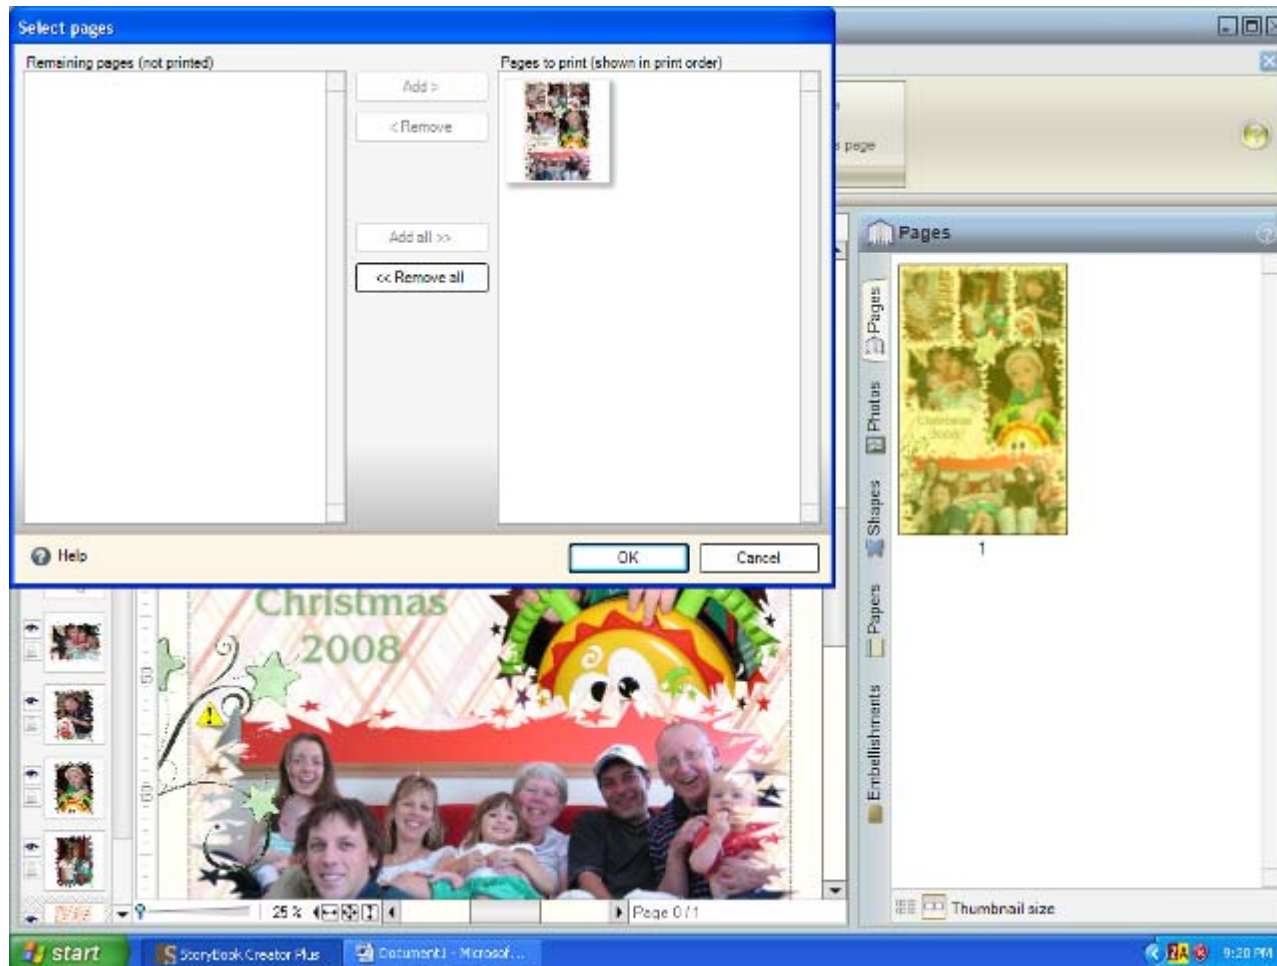

To view a small version of your Poster Print, select the **Pages Panel**.

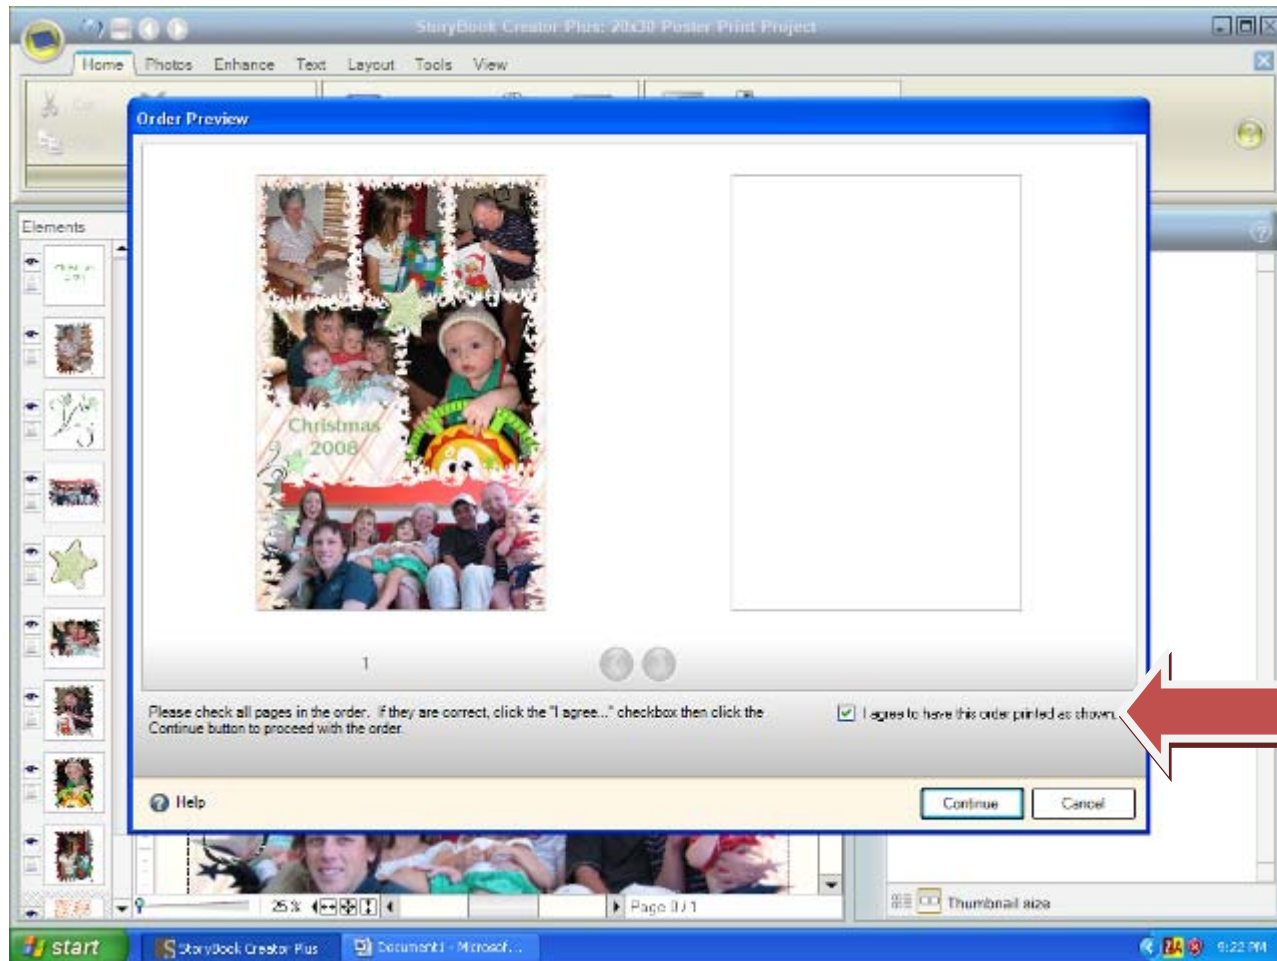

To order your Poster Print, select the **Home Ribbon**, use the drop-down arrow alongside **Order** and click on **Order Product** from the menu.

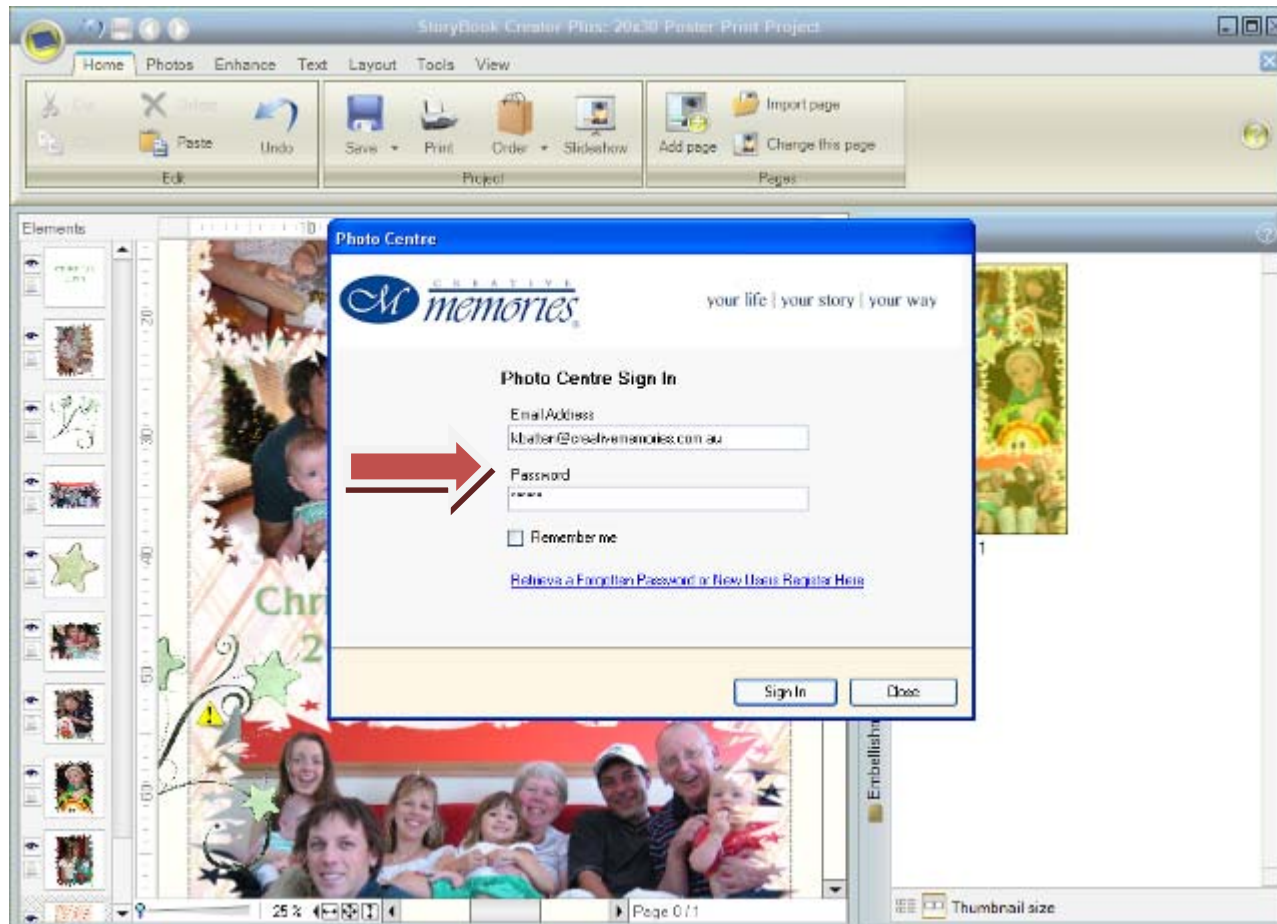

The *Select Pages* dialog box displays, click **OK** to continue.

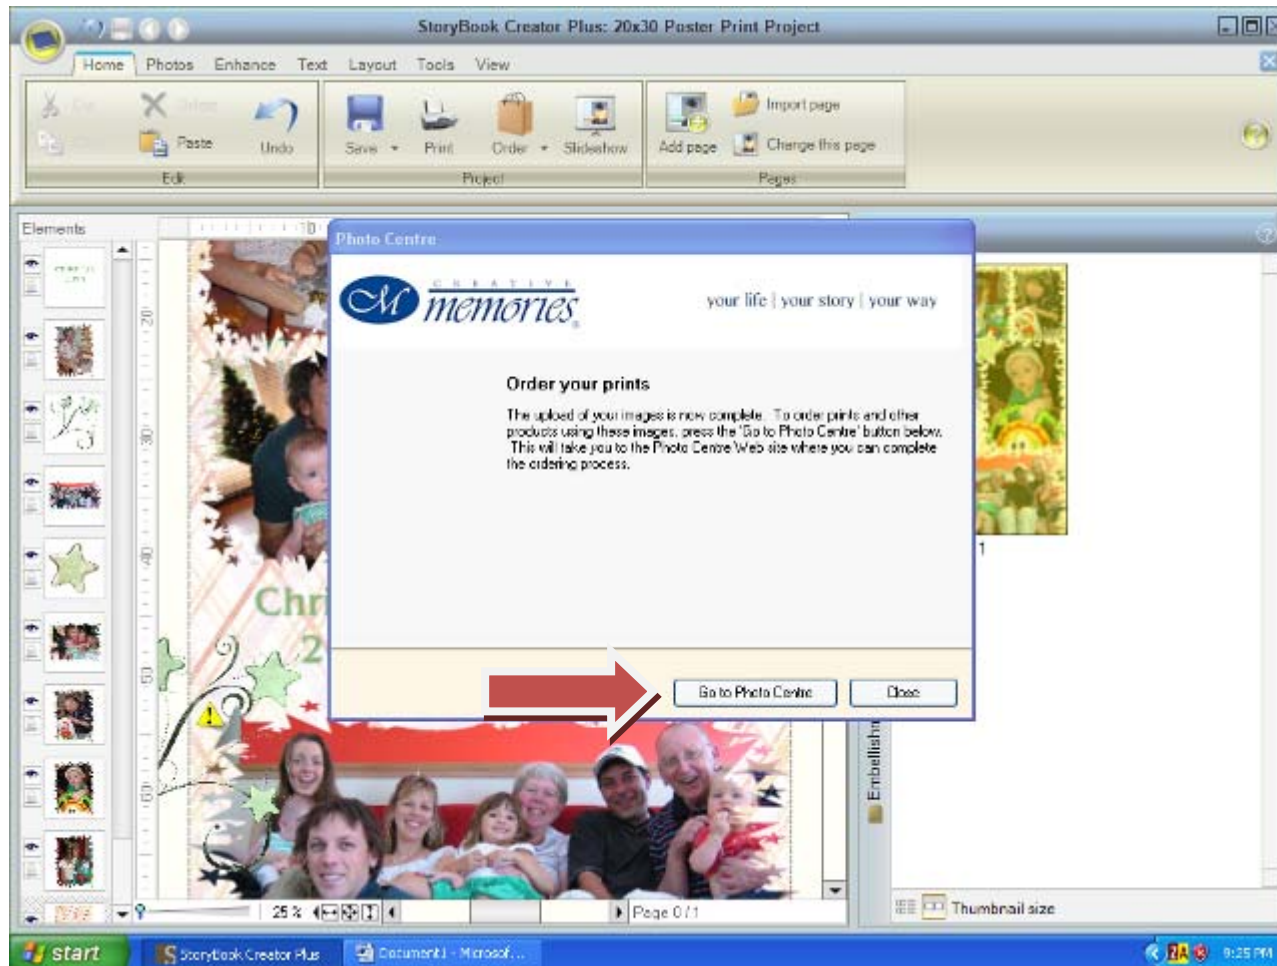

The *Order Preview* dialog box displays, allowing you to view your Poster Print. If you are ready to order your Poster Print, continue by ticking **I agree to have this order printed as shown**. ALWAYS preview your order carefully prior to ordering to avoid errors by checking spelling, and image placement. To proceed click **Continue**.

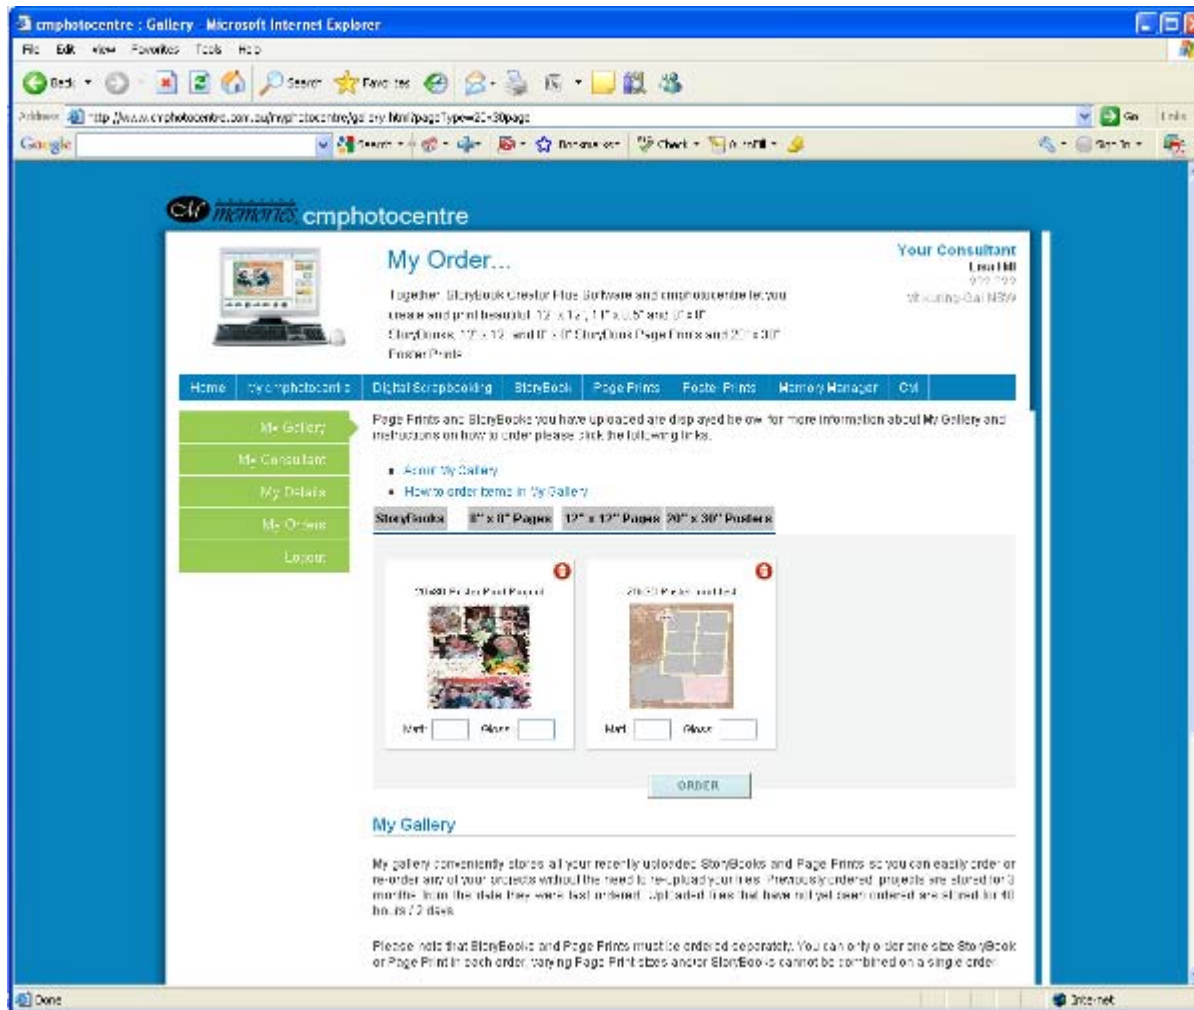

The *Creative Memories Photo Centre* dialog box displays. Enter your email address and password and click **Sign In**. If you are a new customer click **Retrieve a Forgotten Password or New Users Register Here**. You must be connected to the internet. After you sign in your Poster Print will begin to upload, this may take some time depending on your internet connection speed.

The Poster Print will complete uploading and the *Order your prints* dialog will display. To continue with your order click **Go to Photo Centre**.

You will be directed to your gallery on the cmphotocentre website, your uploaded Poster Print will appear on this page.

Enter the number of matt or gloss Poster Prints you wish to order. To continue click **Order**.

The screenshot shows a web browser window displaying the 'cmphotocentre' website. The page title is 'My Order...'. The main content area features a navigation menu with options like 'Home', 'My cmphotocentre', 'Digital Scrapbooking', 'StoryBook', 'Page Prints', 'Poster Prints', 'Memory Manager', and 'CM'. Below the menu, there are sections for 'My Gallery', 'My Consultant', 'My Details', 'My Credits', and 'Logout'. The 'My Order...' section includes a description of the services and a list of products: 'StoryBooks', '8\" x 8\" Pages', '12\" x 12\" Pages', and '20\" x 30\" Posters'. Two product thumbnails are visible: '20x30 Poster Printout' and '20x30 Poster printout'. Below each thumbnail are input fields for 'Matt' and 'Gloss'. A red arrow points to the 'Matt' field for the first product. An 'ORDER' button is located at the bottom of the product selection area. The 'My Gallery' section provides information about the gallery's storage and ordering policies.

Enter your delivery address. Click **Next** to continue.
